Backend engineer with eight years of experience designing distributed, event-driven systems. Specialises in functional programming, observability, and developer experience.

EXPERIENCE

Senior Software Engineer

Acme Corp

Jun 2022 – Present Dublin, Ireland

Platform team lead. Owns the event-sourcing stack underpinning the wider product surface.

- Led the migration of a customer-facing monolith into a set of event-driven microservices, halving p99 latency.
- Designed and rolled out an event-sourcing platform now used by four product teams.
- Mentored three engineers from mid to senior level.

Software Engineer

Liffey Labs

Jun 2019 – Jun 2021 Remote

- Built and shipped the first version of a SaaS product from scratch alongside a two-person team.
- Introduced the CI/CD pipeline and developer-onboarding flow that scaled the engineering org from 3 to 15.

VOLUNTEER

Mentor

CoderDojo Dublin

Jun 2020 – Present

Volunteer-led coding club introducing young people to programming.

- Weekly mentoring sessions for 10–14 year-olds learning to code.
- Curate the Scala / functional-programming track.

Seán is a calm, methodical engineer who left every system he touched in a better state than he found it. Recommended without reservation.

Pragmatic, curious, unfailingly kind — would hire again in a heartbeat.
